

JOSEPH B. SALA, Ph.D.

1           A.     In the rendering industry? I don't  
2 believe that there are specific standards that  
3 would specify the formatting of -- of warnings.

4           Q.     What sets the standards in machine  
5 guarding?

6           A.     Again, I'm not attempting to -- to  
7 offer opinions as to standards of care related to  
8 machine guarding. I think that others will be  
9 addressing this issue and that's outside the --  
10 the -- the scope of my testimony.

11          Q.     You're here as a warnings expert,  
12 though, correct?

13          A.     Correct.

14          Q.     There has to be something that sets  
15 the standard of care for warnings in your field.

16          A.     There are suggestions. Like I said,  
17 there are voluntary standards that are meant to --  
18 to -- to offer guidance to those that are  
19 attempting to design warnings. There are  
20 scientific endeavors to -- to help understand how  
21 and when warnings can be implemented. There are  
22 in certain industries and in certain situations  
23 regulations specifying necessary warnings.

24                      However, there's not a blanket
